

The where: Bahen 3200
The when: 1600 hours
Attending: Will Laura Laith Ken

geography - "where in the world is carmen sandiego"-esque
mathematics - puzzle game (solve math problems to proceed)
sciences - biology (kids love animals)
astronomy - order of planets
history - time travel
language - french
 english? spelling
internet useage?

mini-games, different topics for each game

8-bit music?
graphics - import free-use images? make our own?
Challenges: finding graphics and music, proper age-relevant material

have a cute animal mascot that is anthropomorphic

everyone can do java so let's do java!

Aim for the grade 5-6

Kids hate learning. But kids love games! Therefore, connect learning with games! Problem solved.

Taskmaster & Communication guy: Ken
finding graphics
finding music
finding 5th-6th graders to test on
doing research (what's relevant to 5th6th grade level of education, psychology behind engagement and what is fun)

doing the actual coding: everyone (break it down further later on)

narrow scope: decide on one or two categories

Use in: classroom? At home?
